

Cable

Cables for Fixtures

KEY FEATURES

- / Red nylon jacket
- / 4" to 24" long
- / Loop to loop configuration
- / 304 stainless steel cable
- / Aluminium crimps

APPLICATION

Boneham cables are ideal for linking removable location or alignment components to a fixture. Cables prevent damage or loss of the component by fixing one end of the cable to the fixture and the other to the component.

ORDERING INSTRUCTIONS

When ordering: Choose length of wire required and order corresponding part number. Clips are ordered separately.

Part No.	L	Loop Fixing Size
LC4R	4"	1/4"
